**1. Description of the events leading to Force Majeure Event.**

Provide reasonably full particulars of the cause and timing of the events relating to the invoked Force Majeure. Also provide documentary evidence of the same, including without limitation, the following: newspaper articles, correspondence, emails, notes, reports, memoranda and any other documentation relevant to establishing Force Majeure.

Due to the Essential Services Order 82/20 and COVID-19 a number of contributors in the SOUTHWEST zone have ceased operations or are operating only essential parts of their business. As a result, the contributors listed in attachment A cannot fulfill their individual obligations. Documentation of such impact is found in attachment A.

### 2. Effect of Force Majeure.

Provide reasonably full particulars of the effect of the Force Majeure on the Participants' ability to fulfill its obligations under the Market Rules. Also provide documentary evidence of the same, including without limitation, the following: reports, policy documents, correspondence, emails, notes, memoranda and any other documentation relevant to establishing the effect of Force Majeure.

Due to individual contributors' inability to curtail operations, or lack of operations to curtail, VOLTUS ENERGY CANADA LTD was initially unable to provide 7.0MWs of demand reductions. *As some contributors have now resumed operations, evidenced in Attachment B, VOLTUS ENERGY CANADA LTD is currently unable to provide 1.1 MWs of demand reductions necessary to fulfill its obligation of 22.8 MWs.*

### 3. Commercially Reasonable Efforts

Provide reasonably full particulars of efforts, if any, undertaken or contemplated by the Participant to remedy or mitigate the Force Majeure. Also provide documentary evidence of the Commercially Reasonable Efforts listed, including, without limitation, the following, as applicable: correspondence, emails, notes, memoranda and any other documentation relevant to establishing the efforts to remedy or mitigate the Force Majeure.

VOLTUS ENERGY CANADA LTD (Voltus) could not have predicted or prevented the impacts of the coronavirus on the commercial and industrial electricity loads that underlie our demand response resources. Efforts to evaluate and map the changes to our ability to respond during demand response events are ongoing, and are still subject to rapidly changing conditions. In response to the coronavirus pandemic Voltus has done everything in its power to understand the impact of the pandemic and minimize the effects going forward. To date, Voltus has reached out to all contributors with additional available load above their obligation offering them incentives to increase their load curtailment. Correspondence is provided in Attachment A. New participation may compensate for some of the lost load attributable to the pandemic. *Voltus has been actively monitoring customers operational status as shelter-in-place restrictions have been lifted and some customers have now returned to normal operations, documentation of which can be found in Attachment B.*
