Hi Maria,

Hope you had a good weekend. OPG has some questions regarding the Chapter 9: Market Settlements, Market Billing and Funds Administration. I would appreciate it if you can forward to the appropriate IESO contact.

1. From MR-00456-R00 of Chapter 9: Market Settlements, Market Billing and Funds Administration (Updated April 24, 2023), Section 2.2.13 is interpreted that an electricity storage would need to result in a net injection (injection exceeds withdrawal) in a given metering interval to be eligible for hourly and/or non-hourly uplift reimbursements of any AQEW. Can we please request clarification of our interpretation of the whole section and the incentive drivers for the electricity storage community?
2. Please correct hyperlinks for Chapter 9 clean and redline versions within [Market Settlement Metering and Billing](#) section. The clean and redlined version hyperlinks are reversed.

Thanks,

**Daniel Tadros**
