Total			757.04	308.67	379.96			
Aggregate Total			757	309	380			

Note: While the MTC I Contract is paying suppliers for their unforced capacity (UCAP) or portion of their UCAP if it has been committed to host facilities, this UCAP value takes into account a facility's forced outage rate; the nameplate capacity of each facility represents their theoretical maximum output that can be provided at any one time.
