

Assessment of Impact of Market Rule Amendment on Consumers Re: Price, Reliability, Quality of Electricity Service

This form is used to document the *IESO's* assessment of the impact of a proposed *market rule amendment* on the interests of consumers with respect to prices and the *reliability* and quality of electricity service.

Terms and acronyms used in this Form that are italicized have the meanings ascribed thereto in Chapter 11 of the *Market Rules*.

Part 1 – Market Rule Information

Identification No.: MR-00474-R0

Title: Enabling the Co-located Hybrid Model

Date of Assessment: February 27, 2023

Part 2 – Assessment

The following is the *IESO's* assessment of the impact of the proposed *market rule amendment* on the interests of consumers with respect to price and the *reliability* and quality of electricity service.

Impact of Price:

The proposed amendment will enable new resources to in participate in *IESO-administered markets*. This will increase competition within *IESO-administered markets* and potentially reduce *energy* prices.

Impact on Reliability of Electricity Service:

The proposed amendment is intended to maintain reliability by ensuring that resources that are providing ancillary services and/or participating in the operating reserve market are scheduled in a manner that will ensure they are available to provide the services they have been contracted to provide.

Impact on Quality of Electricity Service:

None
