IESO Stakeholder Engagement
Market Renewal Program

Submitted via email

Re: Load Pricing in Market Renewal

Shell Canada Products is aware of the extensive consultations that are currently taking place in regards to the IESO's Market Renewal Program. In particular, Shell Canada Products has a specific interest in the discussions that are ongoing regarding load pricing in the renewed market.

Shell Canada Products is aware of the IESO's recommendation for a Zonal / Nodal pricing construct in regards to load pricing. Further, we have reviewed the submissions of the Association of Major Power Consumers in Ontario (AMPCO) - of which we are a member. Shell Canada Products fully supports the positions set out by AMPCO in its submissions to the IESO on this subject.

Shell Canada Products trusts that the IESO will consider this feedback in its consideration of the appropriate path forward in this matter. We appreciate the opportunity to provide such feedback.

Regards,

Yours sincerely
