Summary

It is proposed to remove the IESO's obligation to publish, six months from the end of each subject month, the monthly average maximum continuous rating, the monthly capability factor and monthly planned capability factor from the discontinued Monthly Generator Disclosure Report.

Background

Market rule amendment [MR-00353](#), which came into effect on September 8, 2010 intended to fully remove the market rule obligations which obligated the IESO to publish the Monthly Generator Disclosure (Monthly) Report,¹ which has been discontinued. Since publishing the Hourly Generator Output and Capability (GOC) Report in 2003, the Monthly Report, which published information six months from the end of each subject month had ceased to be relevant. Although MR-00353 deleted the obligation to publish the monthly energy production for each generating station in the market rules, it inadvertently did not delete the market rule obligations to publish the monthly average maximum continuous rating (MCR), the monthly capability factor and monthly planned capability factor columns of the Monthly Report.

The Hourly GOC Report² presents the energy output and capability (both in MW) of each generating facility. The "Capability" column of the GOC Report is defined as the unit's net MCR less the maximum derating within the hour, and is a measure of the maximum amount of power that was capable of being produced by that unit during a given time. The "Capability" column of the GOC report replaces the monthly average MCR information, monthly capability factor and monthly planned capability factor from the discontinued Monthly Report.

PART 4 – PROPOSAL (BY SUBMITTER)

Provide your proposed amendment. If possible, provide suggested wording of proposed amendment.

Remove the IESO's obligation to publish, six months from the end of each subject month, the monthly average MCR, the monthly capability factor and monthly planned capability factor from the discontinued Monthly Report.
