Subject: Industrial Accelerator Program Enhancements Next Steps
Attachments: IAP_Feedback Summary and IESO response June 1_FINAL.pdf

The IESO would like to thank those stakeholders who provided feedback on the enhancements proposed for the Industrial Accelerator Program (IAP) under this stakeholder engagement initiative. The attached summarizes the feedback that was received and outlines the IESO's response including how the feedback was considered to shape the enhanced IAP.

The implementation of the enhanced IAP will follow in two stages:

Stage I expected to be completed on June 24, 2015:

- In response to stakeholder input, the IESO will incorporate an energy manager initiative. A new Energy Manager Participation Agreement is expected to be available on June 24, 2015.
- In addition, the IESO will be revising all existing participant agreements to incorporate the extension of the program to reflect the 2020 eligibility timeframe.

Stage II to be announced soon:

- In order to incorporate further enhancements, the IESO will invite stakeholders to provide input on the participation agreement for the Process and Systems stream. Further details to follow in June.

The [Industrial Accelerator Program Design Enhancements stakeholder engagement webpage](#) has been updated to reflect the next steps in this initiative. Please email stakeholder.engagement@ieso.ca if you have any questions.

Regards – Susan Harrison
