

RSSC Members:

Please note that additional IESO draft certification forms have been posted on the IESO web-site for review and comments.

The posted certification forms relate to verification of real and reactive power capabilities of generators (gross and net values) and are based on requirements defined by NPCC documents A-13 (Approved by NPCC) and A-14 (Not yet approved) along with additional IESO requirements pertaining to provision of monthly generator capability values. Also, please note that the IESO is working on updates to its market manual(s) in order to provide rules and procedures around the generator capability verification and certification process. Hence, changes to the draft certification forms could occur as a result of:

- Your review and comments; and
- Stakeholdered modifications to the proposed revisions in affected market manuals.
