Subject: Fwd: Wind Power Integration in Ontario Standing Committee meeting - February 20, 2008

Maia,

I am seeking your advice on the appropriate time to raise an issue of concern. As Ontario moves more towards wind generation in 10 MW and smaller corporate units, I want to know what production data will be available to observe the actual performance of these units. The existing per farm data for the above 20 MW farms has proven to be very helpful, and building on that good data release standard would be helpful.
