Suggestions / Comments

- Perhaps the only general comment I have is that there was not so much a discussion as there was a presentation by people about their specific problem or issue – with such a diverse group of people this is not a surprise.
- While it is good to know everyone is invited to attend these meetings I think the biggest issue is a challenge to take seriously an environment where the Bruce's and OPG's of the world are invited to discuss the impact policy has on their operations, knowing they are big enough to work outside deals, while the smaller players have no such similar leverage and yet are at the same meetings. Just an observation – given my career I will always enjoy the meetings regardless of their effectiveness at the lower levels.
- The teleconference option was difficult to hear. The presenters were fine but the questions were very difficult to hear.
- Excellent presentations and topics that all took into consideration recent, important developments.
- Please give consideration to providing better audio facilities for those on the phone.
- IESO should acquire improved telecommunication equipment to allow a better conference call experience, e.g., satellite microphones on Polycom system.
- It would be better to have a more detailed agenda ahead of time to aid discussions.
