

Embedded and Renewable Generation (including periods of surplus baseload generation) - SE-57

Agenda

Date: December 2, 2009	Time: 10:00 am – 12:00 am
Location:	Conference call
Meeting Sponsor:	Darren Finkbeiner
Meeting Chair and Facilitator:	Jessica Savage
Scribe:	Devon Huber

Meeting Objectives: The purpose of this meeting is to update stakeholders on Embedded and Renewable Generation. The meeting will address centralized forecasting for variable generators and minimum load management for surplus baseload generation.

Action required: Stakeholders should review materials on the web at:
http://www.ieso.ca/imoweb/consult/consult_se57.asp, including the presentation for December 2

Time	Agenda Item	Responsible Party	Expected Actions
10:00	Welcome / Introduction	Darren Finkbeiner	Information
10:05	Centralized Wind Forecasting	Devon Huber	Feedback
10:30	FIT Dispatch & Operability	Gordon Drake	Information
11:00	Surplus Baseload Generation <ul style="list-style-type: none"> • Peak versus average • Generation cost guarantees and commissioning • Curtailment protocols for FIT, RES, NUG contracts • Minimum load management 	Jessica Tang Jo Chung Darren Finkbeiner	Information Feedback
11:55	Next Steps	Darren Finkbeiner	Discussion
