

<b>Test Case ID:</b>	I-001-MT	
<b>Test Case Name:</b>	EELR submits revised dispatch data with the DEL >0 MWh between 10:00 and 12:00 on the pre-dispatch day; dispatch data accepted.	
<b>Test Case Description:</b>	Before 10:00 on the pre-dispatch day, EELR submits the initial dispatch data with a DEL value of 0 causing the EELR to not be used in the initial DACP run. Between 10:00 and 12:00 on the pre-dispatch day, EELR submits revised dispatch data with the DEL >0 MWh; submitted data is validated and accepted to be used in the next run of the Day-Ahead Calculation Engine (DACE).	
<b>Test Case Version:</b>	1	
<b>Pre Condition:</b>	<ul style="list-style-type: none"> <li>* MP must indicate that resource is an ELR with a DEL before 10:00 on pre-dispatch day</li> <li>* MP submits dispatch data for EELR between 10:00 and 12:00</li> <li>* Applicable to Dispatchable Generators that are an EELR resource</li> </ul>	
<b>Data (including system data, application data, and transient data)</b>	<ul style="list-style-type: none"> <li>* Economic incremental Energy offers (before 10:00 and on re-submission between 10:00 &amp; 12:00)</li> <li>* Daily energy limit of 0 MWh initially (before 10:00)</li> <li>* Daily energy limit of &gt; MLP x 1 hour on re-submission between 10:00 &amp; 12:00</li> </ul>	
<b>Tools used in test case:</b>	MPI or API	
<b>Post Conditions</b>	<ul style="list-style-type: none"> <li>* MP's resubmitted dispatch data is used in DACE and pre-dispatch</li> <li>* MP receives a non-zero day-ahead schedule that respects the re-submitted DEL</li> </ul>	
<b>Actor</b>	Market participant, DACP Operator	
<b>Priority</b>	1	
<b>Resource Type</b>	EELR

<b>Procedures including version:</b>	<ul style="list-style-type: none"> <li>* Market Manual 9.2 Procedures for Submitting Operational and Market Data for DACP v4.0</li> <li>* Internal Manual 2.15-2 Registration and Data Submission before DACP v4.0</li> </ul>	
<b>Procedure Sections</b>	<ul style="list-style-type: none"> <li>* MM 9.2 Section 5.1.9 - Procedural Steps for Submit New or Revised Dispatch Data</li> <li>* IM 2.15-2 Section 2.3 - Receive Market Participant Data Submissions</li> </ul>	
<b>Process :</b>	Initialization	
<b>Comment:</b>	<ul style="list-style-type: none"> <li>* EELR must submit Daily Energy Limit (DEL) with the initial dispatch data at a value of 0. This will result in the resource not being scheduled in the initial DACP run.</li> <li>* System test</li> </ul>	
<b>Step #</b>	<b>Step Description</b>	<b>Expected Result</b>
1	Before 10:00 on the pre-dispatch day, EELR submits the initial dispatch data with a DEL value of 0.	The EELR resource will not get scheduled in the initial DACP run.
2	Between 10:00 and 12:00 on the pre-dispatch day, MP submits revised dispatch data via MPI or API with DEL >0 MWh.	IESO receives, validates, and accepts submitted dispatch data with a revised DEL.
3	Market participant receives a DACP schedule respecting the revised DEL.	The EELR resource will get scheduled in the next DACP run.
