

IESO-NYISO Intertie Transaction Failures

Intertie Jurisdictional Trading
March 5, 2008

- In July of 2007, the IJTSC discussed the historically large amount of security failures reported between New York and Ontario.
- Investigation revealed that NYISO was communicating transactions that failed as a result of their constrained LMP dispatch as security failures when in actuality they failed due to economics.

- Following communication with NYISO, it was agreed that they would begin communicating failures that result from their Real Time Commitment process as economic.
- This change took effect on December 20, 2007 HE1.

**Failed Export Transactions to New York
from September 1 to February 19**

Failed Import Transactions from New York
from September 1 to February 19
