Long-Term 2 (LT2) RFP – February 15, 2024

Feedback Provided by:

Name: Andrea Marin Monterrubio

Title: Director of Origination, Americas

Organization: Prologis

Date: February, 2024

To promote transparency, feedback submitted will be posted on the Long-Term RFP engagement page unless otherwise requested by the sender. If you wish to provide confidential feedback, please mark "Confidential".

Following the LT2 RFP February 1, 2024, engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on specific items discussed during the webinar. The webinar presentation and recording can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by February 15, 2024.

Revenue Model

Topic	Feedback
<p>Do you have any additional comments regarding the revenue model, particularly with regards to the following: Deeming energy market revenues based on real-time locational marginal prices (LMP), as opposed to the IESO's recommendation of basing this on the day-ahead LMP. (Slides 19-21)</p> <ul style="list-style-type: none">• The optionality of using either a simple average day-ahead price or weighted average LMP, with the latter including hours where the resource was scheduled day-ahead in a given month. (Slides 22-23)• Including monthly production factors that on average equate to the annual production factor, in order to further account for seasonality. (Slides 24-26)	<p>For DERs, project selection should not solely be based on price. A singular focus on price undermines the competitiveness of DERs as they simply cannot compete against utility-scale projects.</p> <p>We strongly recommend that the IESO establish a separate objective for DERs, prioritizing locations where these resources are most crucial.</p>

DERs

Topic	Feedback
<p>Do you have any comments regarding eligibility requirements for DERs or other general comments?</p>	<p>Certain requirements, for instance, municipal support for rooftop solar, may not uniformly apply to all DERs. Consequently, we strongly advocate for the IESO to consider these exceptions when framing the solicitation protocol. Alternatively, we propose allowing for such flexibility while evaluating the bids, to ensure that the unique circumstances and constraints surrounding DERs are taken into account.</p>

Capacity Resources

Topic	Feedback
Do you have any comments regarding considerations for acquiring additional capacity resources, and utilizing a multi-stream approach (energy and capacity streams)?	

LT2 Deliverability

Topic	Feedback
Do you have any comments on early deliverability data and evaluation stage deliverability?	

Repowering

Topic	Feedback
Do you have any comments around repowering participation?	

Long Lead-Time Resources

Topic	Feedback
Do you have any comments on enabling long-lead time resources?	

General Comments/Feedback
