

Feedback Form

Long-Term 2 RFP | Deliverability Guidance Document | April 18, 2024

Feedback Provided by:

Name: Julien Wu

Title: Director, Regulatory Affairs

Organization: Evolgen by Brookfield Renewable

Email: [REDACTED]

Date: May 3 2023

To promote transparency, feedback submitted will be posted on the Long-Term RFP engagement page unless otherwise requested by the sender. If you wish to provide confidential feedback, please mark "Confidential".

Following the LT2 RFP Guidance Document webinar on April 18, 2024, the Independent Electricity System Operator (IESO) is seeking feedback from participants on the items discussed during the session. The presentation material and recording can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by May 3, 2024.

Guidance Document: Readability and Layout

Topic	Feedback
Do you have any advice or feedback on the style, layout and overall readability of the April 2024 Deliverability Guidance Document released by the IESO?	

Guidance Document: Content

Topic	Feedback
<p>Are there any specific areas of the Deliverability Guidance Document that you would like to provide feedback on from a technical and/or content-specific point of view?</p> <p>If so, please be as specific as possible in your feedback and consider using page numbers and content title where possible to ensure the IESO can consider your feedback accurately</p>	
Do you find the preliminary connection guidance information sufficient for your siting needs? If you feel more information is required, please be specific on what other information you would find useful.	

General Comments/Feedback:

Evolugen by Brookfield Renewable appreciates the opportunity to provide feedback.

We commend the IESO interconnection team's effort to improve the information available to proponents of various IESO RFPs. In comparison to earlier guidance for interconnection and deliverability testing, this version presents vastly improved information and accounted for much of the feedback from industry stakeholders. Your efforts would help encourage industry participation in future RFPs.

We recommend the additional improvements below for the LT2-RFP and beyond to help proponents site and develop projects in an expeditious and economical manner.

- Please confirm the key dates and timeline for the pre-bid deliverability assessment process (e.g., information submission due date and testing outcome release date...) at the project level. Please confirm if this process will follow a similar sequence and timeline as the Exp- and LT1-RFPs. In particular, please confirm how much time would be available to proponents between the pre-bid deliverability outcome's release date and the final bid date. A longer timeframe from the deliverability testing's outcome and the final bid date would be critical for proponents to manage site control, council resolution, financing, procurement commitments, as well as any unexpected changes, to finalize project modeling on time.
- We strongly request the IESO update all information contained in this current report after the LT1-RFP's bids opening.
- Please provide the GIS information of all substations and circuits that the IESO recommend to be "avoided." In addition, general GIS information and maps that delineate interconnection room and limitations by zone (e.g., zonal capacity limits...) would be tremendously helpful for proponents seeking site control and stakeholdering with landowners.
