

# Memorandum

**To:** Technical Panel

**From:** Dan Alexandru

**Date:** January 9, 2024

**Re:** MR-00479-R00 – Transmission Rights Market Enhancement and Platform Refresh

The IESO is proposing market rule amendments to support the implementation of the Transmission Rights Market Enhancement and Platform Refresh project. These proposed amendments, which introduce multi laminations transmission rights bids, are in response to the stakeholder feedback obtained during the Transmission Rights Market Review (June 2021) and to clarify transmission rights auction design. An education presentation on this initiative was provided to Technical Panel members in December 2023.

## Stakeholder Engagement

IESO staff has engaged with stakeholders in July and November of 2023 and received feedback in support of this project. Materials from these sessions, including presentations and stakeholder feedback is available on the [Engagements page](#).

Subsequent to the November stakeholder engagement session, minor amendments have been made to Appendix 8.1 to provide additional clarity to market participants on how transmission rights shall be awarded.

## Panel Action and Next Steps

The IESO recommends that the Technical Panel vote to post the proposed market rule amendment MR-00479-R00 for stakeholder review and comment for a period of 1 week, ending on January 24, 2024.
