

# COMMUNITY ENGAGEMENT: Speaker Series

**Ontario's electricity system connects communities across the province** – let's start a conversation about your community's local electricity needs

**Shared knowledge is a powerful thing.**

# Starting a Conversation

**Getting information is the first step to making good decisions about our province's electricity needs.**

When you invite us to speak at a local community event, you'll hear how we:

- Plan and manage Ontario's electricity system
- Engage with communities across the province to support local development
- Evaluate your community's input into the development of regional energy plans
- Support your community's efforts to save energy and become more energy efficient

Just as important, the IESO aims to meet with communities to learn about:

- Your electricity priorities
- Local development plans in your area
- Energy efficiency and sustainability goals for your community
- Long-range growth plans

**Book us in your community's event calendar today.**

**There are lots of ways to tap into our expertise to help answer your community's energy questions. IESO speakers are available to join:**

- **Conferences**
- **Municipal council meetings**
- **Information sessions**
- **Staff meetings**
- **Association or networking events**

**Reach out to us today at [communityengagement@ieso.ca](mailto:communityengagement@ieso.ca). Make it the beginning of a long-term conversation about making life in your community even better.**

## **Connecting Today. Powering Tomorrow.**

The Independent Electricity System Operator (IESO) works at the heart of Ontario's power system. We deliver key services across the electricity sector including: managing the power system in real-time, planning for the province's future energy needs, enabling conservation and designing a more efficient electricity marketplace to support the evolution of the energy sector.
