2025-2027 Program Plan

Topic	Feedback
What considerations should the IESO keep in mind as we implement the 2025-2027 Program Plan?	Challenging capacity issues in First Nations. It is a major task to pull all our communities together and build capacity, plan and understand the complexity of the electrical system. Regional training programs would be helpful to build up that capacity with IESO staff and others in the electrical system (i.e.: LDC, OPG, HORI, etc.)

Additional Opportunities

Topic	Feedback
The IESO intends to increase the scope and scale of its DSM programming over this longer-term framework – where do you see opportunities that should be considered in the next three to six years	Matawa First Nations Management (a Tribal Council) has two Remote First Nations (Eabaemetoong and Nibinamik) who are Independent Power Authorities (IPAs). They both generate (by diesel) and distribute power to their members. However, they are small IPA and have great cost challenges. In the IESO's work with Local Distribution Companies (LDC) for new program, will this extend to the IPA for new programs and capacity building?

Topic	Feedback
How would you like to be involved? Are there specific topics or initiatives related to DSM that you would like to provide feedback on in future?	On-going communications with ISO staff 807-344-4575.
