Capacity Accreditation for IESO Procurements – Date, September 17th 2026

Feedback Provided by:

Name: Jan Gorski

Title: Director, Government Relations

Organization: Pembina Institute

Email: [REDACTED]

Date: October 1, 2026

To promote transparency, feedback submitted will be posted on the Capacity Accreditation for IESO Procurements engagement page unless otherwise requested by the sender.

- ☐ **Yes – there is confidential information, do not post**
☒ **No – comfortable to publish to the IESO web page**

Following the Capacity Accreditation for IESO Procurements September 17 2026, engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed. The presentation and recording can be accessed from the [Capacity Accreditation for IESO Procurements](#).

Note: The IESO will accept additional materials where it may be required to support your rationale provided below. When sending additional materials please indicate if they are confidential.

Please submit feedback to engagement@ieso.ca by October 1st 2026.

General Comments/Feedback

The Pembina Institute agrees that a more sophisticated way of assessing the contribution of different types of resources to system reliability is needed. The RMI methodology that IESO has recommended seems like a reasonable approach.

Given the complexity of the alternatives to UCAP, the IESO should be clear and transparent about the assumptions used in the chosen methodology. Similarly IESO should be clear about how the chosen methodology will be implemented in future procurements. We recommend continuing with a technology agnostic approach, while clearly defining the system needs for capacity procurements.

Industry should be provided with sufficient notice on when the new methodology will come into force so they have time to develop project proposals that meet the new procurement parameters. This is important as not all energy sources will be affected equally by the new requirements.
