

Upcoming Engagement Activities

Candice Trickey, Director, Corporate Affairs

Engagement Framework

- Enhancements made as part of the new framework in 2020 include:
- designated monthly engagement days;
- increased time to review materials prior to meetings and extended feedback windows;
- new engagement groupings to highlight the interconnectivity of initiatives and corporate priorities;
- comprehensive monthly engagement updates

Continuing to Evolve the Framework

- Better utilization of monthly engagement days for more forward-looking engagement planning
- Provide greater insight into future engagement activities
- Collect earlier feedback on the scope and areas of interest to help shape new engagements
- New opportunities to seek input on priorities from the broader stakeholder community

New & Upcoming Engagements

Initiative	March	April	May	June
Advisory Notices & Operating States	X			
Enabling Resources Initiative		X		
Industrial Energy Efficiency Program				X

Enabling Resources Initiative: Overview

- Objective is to produce an integrated work plan outlining the sequencing, timing and scope of activities to be undertaken by the IESO over the next 5-10 years to enable existing resources to provide services that they cannot fully provide under current market design

Enabling Resources Initiative: Approach

- Activities may include pilots, programs or market enablement depending on which offers the most expedient/efficient path to unlocking resource value
- Work plan will seek to time completion of enablement initiatives to unlock resource potential to participate in Resource Adequacy procurements, as appropriate
- Hybrid Integration Design Project and DER Roadmap scoping work to begin shortly

Enabling Resources Initiative: Next Steps

April Engagement Days:

- **Enabling Resources** engagement launch
- **Hybrid Integration Design Project** engagement launch

May Engagement Days:

- **Distributed Energy Resources Roadmap** engagement launch
