Subject: May 25 Capacity Auction Engagement Response

During the May 25 [Capacity Auction Enhancements](#) engagement meeting, the IESO committed to following up with a response to the following stakeholder question that was received: "If an HDR participant declares a contributor outage using the solution, does that mean an audit will be automatically triggered?". The IESO has reviewed the question and the answer can be found below:

The IESO's capacity auction audit authority is outlined in Market Rule Chapter 9, Section 4.7J.4 and will not be changed as a result of the 2023 Capacity Auction Enhancements, including the HDR contributor outage solution. Under this authority, the IESO may audit, but is not obligated to audit, any/all submitted measurement data and supporting information at any time. Since this authority will not be changed, it is possible that submitted measurement data that includes a contributor outage declaration may not be audited.

Thanks in advance,
IESO Engagement
