## Proposed Amendments to Market Rules and Market Manuals

Topic:	Feedback
Do the proposed amendments to the Market Rules and Market Manuals accurately reflect the design of the enhanced tie-break methodology?	<p>We support the proposed changes to the tie-breaking mechanism, which offer a more transparent and principled approach to resolving capacity auction outcomes. The updated design reduces the potential for the exercise of market power and contributes to greater economic fairness by ensuring that resources are treated equitably in competitive situations. These changes will help strengthen confidence in the integrity of the auction.</p> <p>We appreciate IESO's responsiveness to stakeholder input and look forward to continuing to monitor this enhancement as it is implemented. We welcome further opportunities to provide feedback as design work progresses.</p>
