Clean Energy Credits – February 24, 2022

Feedback Provided by:

Name: Prasath Vinayagamoorthy

Title: Senior Energy Engineer

Organization: 3M Canada

Email: [REDACTED]

Date: 17-Mar-2022

Following the February 24, 2022 engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed during the webinar. The webinar presentation and recording can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by March 17, 2022. If you wish to provide confidential feedback, please submit as a separate document, marked "Confidential". Otherwise, to promote transparency, feedback that is not marked "Confidential" will be posted on the engagement webpage.

Opportunities & Challenges

Topic	Feedback
What are the key opportunities and challenges the IESO should be aware of in developing a voluntary clean energy market?	Differentiating CEC & REC availability. So organization can prefer to buy their credits. Renewable generations is very small part of Ontario mix. How the organization ensure they get 100% Credits (bundled) as signed. How the CEC generated by IESO are used by the customer/organization in IESO zone first.

Design considerations

Topic	Feedback
Which design considerations outlined in this presentation are most important to you and why?	Bundled option – Frist is Green tariff & next preference is PPA. My organization are not much interested in REC market.

Topic	Feedback
What other design considerations should IESO be aware of?	Is IESO is considering CEC & REC? IESO supported on-site CHP generation. How the bundled credit works for the organization with on-site generation (Natural gas). Should have an option to buy bundled credit for these on-site generated MWH.

Engagement Process

Topic	Feedback
Which stakeholder groups and/or design topics are most important to include in the planned focus group discussions?	Bundled credits & credits for fossil fuel on-site generation. How the CEC/REC (unbundled) generated by IESO are used by the customer/organization in IESO zone first. For bundled credit, what is the process and procedure to follow.

Topic	Feedback
Are there any additional engagement opportunities the IESO should consider?	Yes. Once the feedback are received & worked on the CEC, it is nice to have an additional engagement to explain about the final proposal.

Topic	Feedback
Would you be willing to participate in a technical session? If so, on which topic(s)?	Yes. Bundled Credits.

General Comments/Feedback

Thank you for the engagement sessions. As mention above, I would like to have separate credits from Clean fuel source & renewable fuels for the facility to buy. 3M is participating in RE100 program , which is mainly focussed on renewable electricity and not clean electricity for now.
