Title: SVP Operational Excellence

Organization: Enwave Energy

Email: [REDACTED]

Date: March 14, 2022

Following the February 24, 2022 engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed during the webinar. The webinar presentation and recording can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by March 17, 2022. If you wish to provide confidential feedback, please submit as a separate document, marked "Confidential". Otherwise, to promote transparency, feedback that is not marked "Confidential" will be posted on the engagement webpage.

Opportunities & Challenges

Topic	Feedback
What are the key opportunities and challenges the IESO should be aware of in developing a voluntary clean energy market?	Ensuring that the introduction of CECs does not negatively impact the more global decarbonization of Ontario's electrical grid is of paramount importance. We encourage the program to include greening of existing generation assets: for example use of renewable gas in existing CHP assets contracted under CHPSOP should be included.

Design considerations

Topic	Feedback
Which design considerations outlined in this presentation are most important to you and why?	It is important that unbundling be an option to improve overall flexibility.

Topic	Feedback
What other design considerations should IESO be aware of?	Ensure that generation from existing CHP assets can be included if a renewable fuel is used. While thermal energy does not currently appear to be included in the scope (although not specifically excluded in the documentation), a program structure which might be extended to thermal energy in the future would be useful to assist further decarbonization in Ontario.

Engagement Process

Topic	Feedback
Which stakeholder groups and/or design topics are most important to include in the planned focus group discussions?	We would consider ourselves to be in both potential producer (CHP) and consumer stakeholder groups.

Topic	Feedback
Are there any additional engagement opportunities the IESO should consider?	Click or tap here to enter text.

Topic	Feedback
Would you be willing to participate in a technical session? If so, on which topic(s)?	Yes

General Comments/Feedback

We believe that its important that the program define and be transparent around a minimum baseline carbon performance for the grid, and only allow the sale of CECs that keep the grid performance over and above this minimum.
