Date: 20220228

Following the February 24, 2022 engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed during the webinar. The webinar presentation and recording can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by March 17, 2022. If you wish to provide confidential feedback, please submit as a separate document, marked "Confidential". Otherwise, to promote transparency, feedback that is not marked "Confidential" will be posted on the engagement webpage.

Opportunities & Challenges

Topic	Feedback
<p>What are the key opportunities and challenges the IESO should be aware of in developing a voluntary clean energy market?</p>	<p>The IESO's task herein as a result a Ministry directive has the potential to simultaneously displace carbon intensive power generation AND create jobs. It is incredibly important to realize that any Environmental Attributes which the IESO is in possession of (such as those from the FIT contracts) not enter the CEC market contemplated. They will have a direct and negative effect on the intent of the Directive. Any EA which enter the market will devalue the CEC through simple demand/supply economic theory. The IESO must consider this before allowing any pre-existing EAs into the market. Finally, as the value of the CEC reduces so too does the incentive to produce new and additional CEC yielding projects which will directly and negatively affect the number of jobs being created.</p>

Design considerations

Topic	Feedback
<p>Which design considerations outlined in this presentation are most important to you and why?</p>	<p>This market itself is a great thing to be considering at this time. Congratulation to the IESO for commencing this endeavour.</p>

Topic	Feedback
<p>What other design considerations should IESO be aware of?</p>	<p>1) What are the incentives for utility customers to be proponents in the CEC market? 2) Will community solar projects have a role to play? 3) The value should be in the CEC and construction, not the 3rd party evaluations (consultants).</p>

Engagement Process

Topic	Feedback
<p>Which stakeholder groups and/or design topics are most important to include in the planned focus group discussions?</p>	<p>Online access to programs through the Beacon system has failed in my opinion. Online rollout of the program should not make the same mistakes as Beacon.</p>

Topic	Feedback
Are there any additional engagement opportunities the IESO should consider?	Click or tap here to enter text.

Topic	Feedback
Would you be willing to participate in a technical session? If so, on which topic(s)?	Yes. My focus is battery and solar DG development in high-rise residential and ICI spaces. I'd be happy to consider subject mater discussion in most any setting.
