Subject: Invitation to Participate in the April 13, 2022 OEB/IESO Joint Engagement Session on Distributed Energy Resources Integration Framework for Energy Innovation

The Ontario Energy Board (OEB) and the Independent Electricity System Operator (IESO) are hosting the next Joint Engagement on Distributed Energy Resources Integration on **April 13, 2022**. The Joint Engagement session will be held virtually from 9:30 a.m. to 11:30 a.m.

The IESO is collaborating with the OEB with respect to distributed energy resources (DER) integration. The OEB and the IESO have jointly committed to host bi-annual stakeholder meetings to discuss the work of the two organizations as it relates to DERs.

The goal of the OEB/IESO Joint Engagement is to:

- Provide clarity to stakeholders on what topics and issues are being addressed by each organization and in what forums.
- Identify key cross-cutting issues and demonstrate to stakeholders how and when they will be addressed.
- Ensure the OEB's and the IESO's efforts are appropriately coordinated in order to make timely progress on each organization's efforts and DER integration as a whole.

The first OEB/IESO Joint Engagement on Distributed Energy Resources Integration was held on October 20, 2021. In that session, the OEB and IESO provided a list of cross-cutting issues and an update on the work that both organizations are carrying out with respect to DERs.

The April 13, 2022 session will provide an update on cross-cutting issues and the work of the two organizations as it relates to DERs. The session will also provide an opportunity for stakeholders to provide feedback to the IESO and OEB.

Interested stakeholders should register to attend the April 13, 2022 Joint Engagement session by emailing FEI@oeb.ca.

Regards,
IESO Engagement
