Subject: Energy Storage Design Project webinar

The IESO is hosting a webinar on June 24 to discuss and seek feedback on the draft Market Rule and Manual amendments for the Storage Design Project (SDP) interim period prior to Market Renewal, as well as the proposal for the implementation of uplift charges for the long-term period. The presentation will also provide initial details regarding the schedule for market changes explored through the SDP.

The June 24 webinar is scheduled from 10am to 12pm, and registration is [online](#). For more information, please visit the [Energy Storage Advisory Group web page](#). Stakeholders are encouraged to review the posted materials, which include the presentation for June 24, as well as guides to the Draft Market Rule Amendments and Draft Market Manual Amendments. As always, the webinar will include time for questions and discussion. If you have any questions you would like to submit in advance of the webinar, please do so by EOD June 19 by emailing engagement@ieso.ca with the subject line: *Question: Energy Storage Design Project*, and the team will strive to provide responses during the webinar.

Thank you,
IESO Engagement
