Subject: Developing a Future Clean Electricity Fund in Ontario

With electricity demand growing across Ontario, investing in innovation will be critical to ensuring today's needs are met, while anticipating and planning for the electricity system of the future. The IESO is committed to support initiatives that will increase the reliability and cost-effectiveness of the electricity system to meet the future needs of communities across Ontario.

The IESO is in the early stages of developing a Future Clean Electricity Fund, and is seeking insights and recommendations for consideration in developing the fund from a wide range of communities and stakeholders, including municipalities. The Future Clean Electricity Fund is an initiative in response to the Ministry of Energy's "[Powering Ontario's Growth](#)" report that will support the development of new clean energy projects as the province builds out its grid to meet the demands of population growth and economy and electrification of transportation and industry. To learn more about the fund please visit our [website](#).

If you are interested in participating in upcoming engagement opportunities please let our team know by emailing engagement@ieso.ca by October 6, 2023, and our team will be in touch. Should you have any questions, please let us know.
