Subject: RE: Gas Phase-Out Impact Assessment: May Engagement Session

Importance: High

Hello,

As IESO will be taking extra time to review stakeholder questions and feedback, it would be very much appreciated if a project team member can be delegated to review this report – https://www.vibrantcleanenergy.com/wp-content/uploads/2020/12/WhyDERs_TR_Final.pdf.

While the entire United States electricity system is the focus, the two questions answered are directly aligned with the task at hand for the Province:

1. Can DERs lower costs across the entire electricity system compared with alternatives, while maintaining resource adequacy, reliability and resilience?
2. Can DERs provide support and benefits for clean electricity goals across the entire electricity system?

Conducting a study similar in scope, and leveraging a modelling software and methodology this sophisticated would be of tremendous value to the IESO, OEB, Government of Ontario, and all rate payers.

I hope you find this resource useful and applicable, and thank you for diligently responding to your constituent demands to keep our electricity clean.

Have an exceptional long weekend.

Cheers,

Adam Vaiya, B.Sc., C.E.T., C.E.M., LEED AP BD+C
Advisor, Office of Climate Change and Energy Management
