**Subject:** Feedback - Gas Phase-Out Impact Assessment

To Independent Electricity Systems Operator,

I am writing to you to ask you to phase out electricity generating gas plants by 2030. Gas plants are not green and contribute a lot more to green house gasses and our climate changes than the benefits they provide. Ontario has much better, low-cost ways to generate electricity including wind, solar, and Quebec hydro power. Both the US and the UK committed to transitioning to zero carbon electricity systems. Ontario must now make the same commitment. Since the majority of current gas-plant contracts will expire by 2030, it is the perfect time to phase out gas. I am looking to you to lead Ontario into a growing economy with new solar technologies "made in Ontario". I and my friends will be voting next year for a government that starts investing in solar electricity and reduces gas plants. Will you be that government?

Yours truly,

Terry Danyleyko
