Subject: Peel/Halton (GTA West) Long-term Electricity Plan Posted

The Peel/Halton (GTA West) Integrated Regional Resource Plan (IRRP), which considers the long-term electricity demand growth and supply conditions over the next 20 years, is now [online](#) along with a response to the feedback received following the May 6 webinar.

The IRRP recommends a plan to address electricity needs through low-cost technical transmission solutions, while long-term needs present an opportunity to explore emerging alternative solutions, which was a key area of feedback received during the engagement initiative for the development of the plan. Overall, the IRRP concludes that the electricity infrastructure is in a strong position to meet and support future long-term growth in the GTA West.

For background about the study scope, engagement and details about the Peel/Halton (GTA West) electricity planning region, visit the [engagement webpage](#) and download the full IRRP report.

The engagement for the development of the 2021 GTA West IRRP is now closed. The IESO appreciates the participation and input received throughout the engagement initiative and looks forward to continuing discussions through the GTA/Central Regional Electricity Network. Register to join on [IESO Connects](#). By joining IESO Connects, you will receive a regular newsletter with information specific to your region which includes updates on local planning initiatives. Or subscribe to receive the IESO's weekly Bulletin or for information specifically related to electricity planning activities.

Please contact engagement@ieso.ca if you would like to discuss the GTA West IRRP or if you have any questions.
