Date: 2/22/23

Following the February 22, 2023 engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed during the webinar. The webinar presentation and recording can be accessed from the <u>engagement web page</u>. For more details on the Hydrogen Innovation Fund, please see the <u>Low-Carbon Hydrogen Strategy</u> engagement page.

**Please submit feedback to** <u>engagement@ieso.ca</u> by **March 8, 2023**. If you wish to provide confidential feedback, please submit as a separate document, marked "Confidential". Otherwise, to promote transparency, feedback that is not marked "Confidential" will be posted on the engagement webpage.

### General Comments/Feedback

IESO should consider the timing for due dates for a feasibility study project. If the award will not be granted until Q3 2023, it will be difficult to deliver a feasibility study report by December 31st, 2023. My feedback is given in the context of a feasibility study for a larger project – which could take 3-6 months to execute and then another few weeks to write up depending on the scope. So, perhaps end of Q2 2024 could be more reasonable? We may submit revised timeline as we work out the details of the scope of the feasibility study we'd propose. Maybe IESO would be open to being flexible on the delivery date of the feasibility study depending on the scope proposed for the study?
