**Subject:** Hybrid Integration Project engagement – Supplementary information and extended feedback deadline

During the September 21 Hybrid Integration Project webinar, stakeholders requested that some of the points discussed in the meeting be shared through a supplementary document to assist their understanding of the risks and opportunities of each of the models in order to provide meaningful feedback. A document with this supplementary information has been posted to the [Hybrid Integration Project engagement page](#).

Further, a revised feedback form has also been posted to the engagement page, which now includes an additional question on if the implementation of both participation models is desirable from a stakeholder perspective, 1) scenarios when ISM+G Model are used in preference of the Single Resource model, and 2) scenarios when Single resource model is used in preference over ISM+G Model.

The feedback submission deadline has been extended until October 19, 2021. If you have already submitted feedback, please consider providing a new submission using the updated form with the additional question.

Best regards,  
IESO Stakeholder Engagement
