

Stakeholder Feedback and IESO Response

Market Renewal Program: Market Control Entities

ID	MP	Section/Topic	Feedback	IESO Response
1	Capital Power	MCEs	Capital Power is seeking to understand the motivation behind the change; if there will be other accompanying changes to market manuals, templates, or the requested market control entity information required by the IESO; or if the amendments will result in changes on how the IESO plans on administering market power mitigation.	<p>As outlined in the Market Rule Amendment proposal, the current market rules require a market participant to disclose affiliated entities that have limited or no ability to control or influence the participation of that market participant, causing unnecessary administrative burden in the registration process. The motivation behind this change is partly to remove this unnecessary administrative burden.</p> <p>There are no MCE related amendments in the market manuals. The MPM framework will use the Market Control Entity for Physical Withholding (MCEPW) for physical withholding, and there are no changes to that process because of these amendments.</p>
