Subject: IESO Webinar | LT2 Community Update

The Independent Electricity System Operator (IESO) is taking a multi-pronged effort to build a reliable, affordable and sustainable electricity system to meet the growing electricity needs of Ontario's communities. Now that the most recent Long-Term 1 Request for Proposals (LT1 RFP) has [successfully acquired](#) the additional resources needed to meet Ontario's needs this decade, the IESO will be looking to address the emerging needs starting in 2029 through the Long-Term Two Request for Proposals (LT2 RFP).

You're invited to [register](#) for a webinar on July 30 from 2:00 p.m. to 4:00 p.m. that will be held exclusively for Indigenous communities and municipalities to continue discussions and solicit input into the LT2 RFP. Instructions for joining the webinar will be emailed directly to registrants in advance. The webinar will be broken-up in two parts:

- The first part of the webinar will provide an overview of procurement initiatives, the LT2 RFP and key updates, including siting on agricultural land and the proposed community engagement requirements.
- The second part of the webinar will feature breakout discussions for municipalities and Indigenous communities, respectively, to allow for more focused dialogue and opportunities to ask questions.

The IESO is hosting a similar session on [July 23](#) for the broader public and industry. For clarity, the session on July 30 is being held specifically for Indigenous communities and municipalities – your participation and input in this webinar will ensure that your views and experiences are understood and considered as part of the LT2 RFP design process. [Register](#) for the upcoming webinar.

Stay informed by [signing-up](#) to receive information about key initiatives and engagement opportunities most relevant for your municipality.

Please feel free to reach out with questions to communityengagement@ieso.ca.

Sincerely,

IESO Regional & Community Engagement
