## LT2 RFP Capacity Stream

Topic	Feedback
Do you have any feedback to share regarding the capacity stream under the LT2 RFP?	We believe that the IESO and ratepayers will benefit from allowing long duration energy storage resources to participate in the LT2 capacity stream for nearer term CODs, especially in light of the fact that load growth now appears to be more prominent than expected. Having a procurement mechanism in place for shorter lead time LDES will result in more bids and therefore more competitive pricing. In addition, shorter lead time assets can maintain more flexibility in siting which will be beneficial to the IESO as it continues to determine deliverability constraints for upcoming procurements.
