

Feedback Form

Long-Term 2 RFP – August 20, 2026

Feedback Provided by:

Name: Paul Young

Title: Vice President, Generation Development

Organization: Orillia Power Generation Corporation

Email: [REDACTED]

Date: Aug. 31, 2026

To promote transparency, feedback submitted will be posted on the Long-Term 2 RFP engagement page unless otherwise requested by the sender.

- ☐ NO - There is confidential information, do not post
☒ YES - Comfortable to publish to the IESO web page

Following the August 20th, Long-Term 2 RFP engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed. The presentation and recording can be accessed from the [Long-Term Procurement engagement webpage](#).

Note: The IESO will accept additional materials where it may be required to support your rationale provided below. When sending additional materials, please indicate if they are confidential.

Please submit feedback to engagement@ieso.ca by September 4, 2026.

Repowering

Do you have feedback on the proposed requirements?

- Repowering: Requirement for Commercial Operation:

No comment

- Repowering: Competition Mechanics:

This looks reasonable with targets of 1,000 GWh for repowering and 3,000 GWh for new builds.

Federal Crown Land

Please inform the IESO if you intend to site your project on federal Crown land.

We do not intend to site on federal crown land

Disclosure of Additional Pricing Information for Window 1

Do you have feedback the IESO should consider when determining whether to release price curves for LT2 Window 1?

We support release of price curves and more data as long as names of specific proposals and bidders are not revealed

General Comments/Feedback

Do you have additional feedback to share with the IESO?

We are pleased to see the retention of DARTA and believe the lowering of the threshold from 85% to 60% to be reasonable.

We are concerned that the expansion of Locational Rated Criteria may make it uncompetitive for some proposals. We recommend leaving this to apply to Northern Ontario only.

We do not support dropping the restriction on the use of Prime Agricultural Areas. Should IESO wish to consider Agrivoltaics in these areas we suggest that this be done through separate procurement.
