Subject: Confidential Questionnaire Now Posted - LT RFP

LT RFP Stakeholders,

As part of the IESO public engagement process on the development and design of the LT RFP, the IESO will continue to provide stakeholders with an opportunity to submit written feedback that is intended to be posted to the engagement page, responded to by the IESO publically which will help inform future meeting materials and discussions with LT RFP stakeholders. The public feedback form following the February 8 session included a set of questions seeking feedback from stakeholders on a number of the key design considerations discussed during that meeting. The IESO recognizes that not all stakeholders may wish to share commercially sensitive or confidential information in a public forum. Therefore, the IESO has developed a confidential questionnaire to supplement the existing feedback form.

The IESO has posted the confidential questionnaire yesterday to the [LT RFP engagement webpage](#) to provide an opportunity for confidential information to be shared with the IESO.

Stakeholders are able to provide as many questionnaires as required. In addition to these questions, stakeholders are invited to provide the IESO with any additional and relevant information. Should stakeholders wish to discuss their response(s) with the IESO, they are welcome to request that meeting when responding to the questionnaire.

The IESO requests that stakeholders provide their responses to this questionnaire by **March 2, 2022** with completed questionnaires directed to LT.RFP@ieso.ca

Thank you,
IESO Engagement
