In respect of the LT1 RFP

- A very advanced project that is bid into the Expedited Process and is not awarded a Expedited Contract, could still meet a May 1, 2025 in-service date if it were to be awarded a LT1 RFP Contract. Considering how critical the Provincial need for energy capacity is and the value of the increased revenue incentive offered for projects that reach commercial operations by May 2025 under the Expedited RFP, we request that the IESO include the same increased revenue incentive under LT1 RFP.

Please confirm that you received this and that it will be included in the LT1 RFP comments.

Thank you,
