The IESO is posting a series of detailed design documents which together comprise the detailed design of the MRP energy stream.

This design document is posted to the following engagement webpage: <http://ieso.ca/en/Market-Renewal/Energy-Stream-Designs/Detailed-Design>.

Stakeholder feedback for this design document is due on **February 28, 2020** to engagement@ieso.ca.

Please let us know if you have any questions.

General feedback on the Detailed Design Document

Overall OPG found the MRP Revenue Meter Registration – Detailed Design document well written and clear. One general comment is that the diagrams and figures were not always beneficial, often not adding clarity. For example, Figures 2-1 and 6-1 could be better presented as process flow diagrams with sequencing/timelines. A good example of an IESO process diagram is provided at the following link:

[Complete Connection Process](#)

| Design Document: Section | Detailed Comments (Areas of Support or Concern) |
|---|---|
| 1. Introduction | No comment |
| 2. Summary of Current and Future State | No comment |
| 3. Detailed Functional Design: | |
| 3.3 Facility Associations | No comment |
| 3.4 Revenue Metering Requirements for Facility Classes Associated with the Future | No comment |

| Design Document: Section | Detailed Comments (Areas of Support or Concern) |
|--|---|
| Market | |
| 3.5 Provision of Information to Related IESO Processes | No comment |
| 3.6 Provision of Information to Market Participants | No comment |
| 4. Market Rule Requirements | <p>Comment #1: As part of MRP, it is OPG’s understanding that the changes to revenue meter registration IESO market rules will be put through the same stakeholder review process (including via the technical panel) that already exists, allowing OPG to view and comment on the proposed changes to existing market rules.</p> |
| 5. Procedural Requirements | <p>Comment #2: As part of MRP, it is OPG’s understanding that the changes to revenue meter registration IESO market manuals will be put through the same stakeholder review process that already exists, allowing OPG to view and comment on the proposed changes to existing market manuals.</p> |
| 6. Business Process and Information Flow Overview | <p>Comment #3: <i>Figure 6-1: Meter Registration Process Data Flow Diagram:</i> OPG found this figure confusing and hard to understand as there is a lot of interconnecting information and arrows. The figure could be better presented as a flow diagram with timing/sequencing. A good example of an IESO process diagram is provided at the following link:</p> <p>Complete Connection Process</p> |
