Ashley Bacon	Emera Energy	Regrets
Candice Trickey	IESO	Attended
Maria Go	IESO	Attended
Cynthia Sidalak	IESO	Attended

## MRP Implementation Working Group Meeting Summary May 23, 2025

## Agenda Item 1: Market Renewal Launch (with materials)

- May 23, 2025 is the last Implementation Working Group meeting as the renewed market has been launched.
- The IESO went through the presentation that provided a summary of events that occurred during the transition to the renewed market, as well as next steps.
- IWG members thanked the IESO for a smooth transition and the support the MRP External Readiness Team provided to them leading up to market renewal launch.
- An IWG member expressed concern that they were not always receiving sufficient and timely responses from enquiries that they submitted to the Customer Relations mailbox. The feedback will be relayed to the IESO's Customer Relations team.
- An IWG member indicated that they are observing a couple of issues in the renewed market: the Capacity Transaction Flag is configured differently in the Sandbox and Production environments, and that reports for intertie traders contain decimal numbers for energy values that is causing extra work as they result in settlement errors that need to be corrected.

**Action Item:** The IESO will investigate and provide a status update to the IWG member.

- An IWG member noted that they have been observing volatile market prices and high
  Operating Reserve (OR) prices since the launch of the renewed market. They asked if the
  IESO will be providing rationale on why the market prices/outcomes are different from what
  they previously saw in the legacy market.
  - The IESO noted that these types of questions will be addressed during the June 4 Renewed Market webinar.
- An IWG member expressed that they would like to see new reports for the renewed market.
   The IESO asked for IWG members to send their feedback to the IESO Customer Relations team for consideration.
- An IWG member noted that they have outstanding issues where they require assistance from the IESO. Since the renewed market has been launched, they asked if there is a central point of contact they can work with to help them resolve these issues.
  - **Action Item:** The IESO will forward this request to the IESO Customer Relations team to ensure that the IWG member can work with the appropriate IESO team.
- The EDA expressed their thanks and appreciation for the work the IESO did to provide clarity
  on how the renewed market would impact downstream stakeholders such as LDCs, and their
  participation and support in the LDC-IESO MRP Preparedness Group meetings.
