Subject: Posting of Final Regional Planning Document for Peterborough-Kingston Region

The Peterborough-Kingston Region Scoping Assessment Outcome Report (Scoping Report) has been posted to the Independent Electricity System Operator (IESO) [website](#).

The report details the need for a more comprehensive integrated regional resource plan (IRRP) and includes the terms of reference for the IRRP which outlines the timing and details of the work to develop this 20-year electricity plan for the region.

Engagement will continue throughout the development of the IRRP with more details to follow. The [engagement webpage](#) continues to be a source of ongoing information related to the Peterborough-Kingston regional planning activities, including any upcoming engagement initiatives.

As mandated by the Ontario Energy Board, the IESO is required to complete a Scoping Report and Terms of Reference as part of the regional electricity planning process. This final document follows a two-week comment period.

For more information about the scoping assessment process, please visit the IESO's website on how the regional planning process works [here](#).

To stay informed about electricity planning in Peterborough-Kingston, please [subscribe](#) for updates. To be part of a broader discussion on electricity matters and priorities in eastern Ontario, [join](#) the IESO's East Regional Electricity Network.
