What is Beacon?

Beacon is a new tool that the IESO introduced in 2019 that enables you to manage all of your active microFIT Contracts online. Beacon consolidates all microFIT Contract information into one place and integrates the Contract management functions of the microFIT program, creating a single comprehensive and secure system that allows for accurate and efficient data management.

Beacon is used to view information, manage contractual obligations, and send and receive notifications for existing microFIT Contracts.

microFIT Program Roles

Beacon allows for the following microFIT Program Roles for the purpose of managing the microFIT contract as described below.
