Disclaimer

This document shall be used for guidance purposes only and does not amend the microFIT Contract or microFIT Rules under any circumstances. In the event of a discrepancy between this guidance document and the microFIT Contract or microFIT Rules, the microFIT Contract or microFIT Rules, as applicable, will prevail. Nothing in this document shall be binding on the IESO.

A microFIT Contract is not automatically assigned when the real estate property containing a microFIT Facility is sold or otherwise conveyed. Further, any change or addition to the Supplier named on a microFIT Contract requires the completion of the IESO's microFIT Contract Assignment Process.

The microFIT Contract Assignment Process requires the participation of both the current Supplier (the "Assignor") and the prospective new Supplier (the "Assignee"), and must be completed through the IESO's online contract management portal, Beacon. The following steps will guide the Assignor in completing the Contract Assignment Request.

Before you Begin:

Before an Assignor can assign a microFIT Contract, the following must be completed by the Assignee:

- The Assignee must register for a Beacon account and register a Supplier;
- The Assignee must provide their Supplier ID and Supplier Legal Name to the Assignor;
- The Assignee must set-up a Generator Account with their local distribution company, and
- The Assignee must be an Eligible Participant, as defined in the applicable Eligible Participant Schedule.

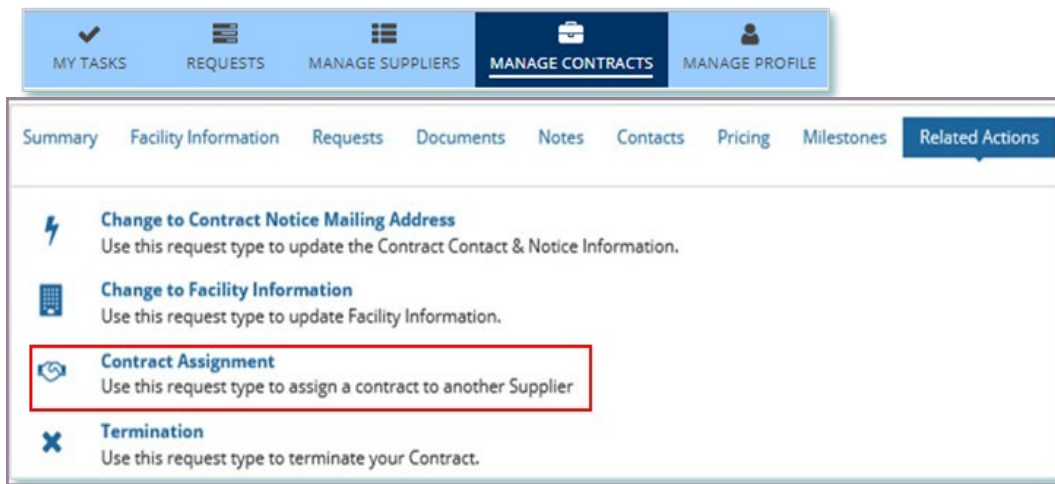

Also, please be sure to download any applicable Contract documents you would like to retain for your records, as these will not be available to you once the microFIT Contract Assignment request is **completed**.
