Subject: IESO Webinar | East Lake Superior Regional Planning
Date: June 18, 2025 3:32:28 PM

Regional electricity planning is underway for the East Lake Superior Region to ensure a reliable supply of electricity, and to support local growth and economic development. Regional planning looks at the unique needs of each region and considers wire and non-wire options and innovative resources to meet the needs. This region extends from the Township of Dubreuilville in the north to the Town of Bruce Mines and includes the City of Sault Ste. Marie and the Township of Chapleau.

On **Wednesday, July 9 at 10:30 a.m.**, the IESO will host a webinar to provide an overview of the electricity landscape and the regional planning process, as well as seek your feedback on the draft electricity demand forecasts and our proposed engagement plan. All interested parties are invited and encouraged to participate including, but not limited to, local municipalities, Indigenous communities, businesses, stakeholders and members of the public.

All participants are asked to [register in advance](#). Webinar materials will be shared for review in advance of the webinar and written comments will be invited until July 30. For more information, please visit the [East Lake Superior engagement webpage](#). Please feel free to reach out with questions to engagement@ieso.ca.

Sincerely,
Jessica Singh
