Subject: IESO Webinar | East Lake Superior Regional Electricity Planning
Date: November 20, 2024 10:12:42 AM

Regional electricity planning has kicked off in the [East Lake Superior electrical region](#) to ensure a reliable supply of electricity and support local growth and economic development. Regional planning looks at the unique needs of each region and considers wire and non-wire options and innovative resources to meet the needs. This region extends from the Township of Dubreuilville in the north to the town of Bruce Mines and includes the city of Sault Ste. Marie and the township of Chapleau.

The IESO is hosting a [webinar](#) on Wednesday, December 4th at 10:00 a.m. to provide an overview of the electricity planning process and seek input on a draft Scoping Assessment Outcome Report to determine the most appropriate planning approach going forward to meet electricity needs. All interested parties are invited and encouraged to participate including, but not limited to, local municipalities, Indigenous communities, businesses, stakeholders and members of the public.

[Register to participate](#). Webinar materials and a draft copy of the report will be shared for review in advance of the webinar and written comments will be welcome until Wednesday, December 18.

Visit our website to learn more about the [East Lake Superior region](#) or for more information about the [Regional Electricity Planning Process](#).

Regards,
Jessica Singh
