Subject: IESO Webinar - Ottawa Area Regional Electricity Planning
Date: May 20, 2025 9:37:48 AM

Regional electricity planning is underway for the City of Ottawa to ensure a reliable supply of electricity and support local growth and economic development.

An Integrated Regional Resource Plan (IRRP) will be developed, looking at the unique needs of the area, and will consider options and innovative resources to meet future needs. Your input will inform all aspects of this process.

On **Monday, June 9 at 1:00 p.m.**, the IESO will host a webinar to share the detailed analysis of screened-in options and seek input on the draft recommendations. The IESO will also share details regarding the Local Achievable Potential Study that will identify and quantify electricity savings potential, electricity demand savings potential and associated costs attainable through energy efficiency and behind-the-meter distributed energy resources in the City of Ottawa.

Register to participate in the June 9 webinar. Materials will be available in advance and written comments will be welcome until June 30.

Visit our website to learn more about this [engagement](#) and for more information about the [regional electricity planning process](#).

All interested parties are invited and encouraged to participate including, but not limited to, local municipalities, Indigenous communities, businesses, stakeholders and members of the general public.
