Subject: Sudbury/Algoma Regional Electricity Planning

The final [Sudbury/Algoma Scoping Assessment Outcome Report](#) and the [IESO's Response to Feedback](#) are now posted.

The report details the need for a coordinated regional planning approach and development of an electricity plan – Integrated Regional Resource Plan (IRRP) – for the Sudbury/Algoma electrical region. The IESO appreciates feedback received regarding this approach.

Engagement and outreach continue to remain central to the IESO's planning process. As the planning process advances, the IESO is committed to working collaboratively with consumers, developers, Indigenous communities, municipalities, and other interested parties each bringing unique perspectives and expertise to shaping Ontario's energy future. Over the coming months, the IESO will offer opportunities for engagement at key milestones in the plan's development. The Sudbury/Algoma [engagement webpage](#) continues to be a source of ongoing information related to the regional electricity planning activities, including any upcoming engagement opportunities.

The IESO looks forward to further engagement with Indigenous communities, stakeholders, and other interested parties on this electricity planning initiative.

To stay informed about electricity planning in Sudbury/Algoma, please [subscribe](#) for updates, or visit the Sudbury/Algoma [engagement website](#) for resources and upcoming engagements.

You can also visit our website to learn more about the about the [Regional Electricity Planning Process](#).

Best regards,
Brooke
