Regional Electricity Planning in Toronto – December 5, 2024

Feedback Provided by:

Name: Ryan Moore

Title: Senior Director of Development

Organization: BGO

Email: [REDACTED]

Date: December 11 2024

To promote transparency, feedback submitted will be posted on this [engagement webpage](#) unless otherwise requested by the sender.

Following the Toronto regional planning webinar held on December 5, 2024, the Independent Electricity System Operator (IESO) is seeking feedback on the draft regional electricity needs and the Local Achievable Potential Study. A copy of the presentations as well as recordings of the sessions can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by January 3, 2025.

Regional Planning - Draft Electricity Needs

Topic	Feedback
What feedback do you have regarding the draft electricity needs identified?	I am not clear how the IESO planning helps the local Toronto Hydro capacity limitations. Will any capacity and distribution improvements by IESO also improve TH's capacity as it is a downstream supplier? Or will TH be responsible for local infrastructure which would have to be upgraded to take advantage of IESO improvements.
What feedback do you have regarding how to meet the electricity needs to inform upcoming milestones?	Is virtual net metering being considered as a demand management and generation tool?
What additional information should be considered as we screen high-level potential options?	Click or tap here to enter text.
What additional information should be provided in future engagements to help understand perspectives and insights?	Click or tap here to enter text.

Local Achievable Potential Study (LAPS)

Topic	Feedback
What feedback do you have on the scope that the IESO should consider?	Click or tap here to enter text.
What feedback do you have on the methodology that the IESO should consider?	Click or tap here to enter text.
What feedback do you have on the potential uses for the LAPS that the IESO should consider?	Click or tap here to enter text.
What additional sources or regional policies and trends should be considered?	Does IESO have a plan to fully decarbonize Ontario's electricity grid, including peaker plants?
