

# IESO Engagement Update – February 5, 2021

This engagement update provides a snapshot of all active IESO engagement activities. It also helps support a greater understanding of linkages between engagements, and a foundation for more comprehensive and integrated updates. For the most recent information, visit the individual engagement links or the [Active Engagements](#) webpage.

## Forecasting and Planning

Engagements to support provincial and regional electricity planning over the next 20 years.

**Design for Energy Storage Participation**

This engagement had the objective to develop the design for how storage will be able to participate and operate in IESO-Administered Markets (IAMs), in both an interim period, as well as on an enduring basis.

*Engagement Lead:* **Colin Campbell**

*Related Engagements:*

- [Capacity Auction](#)
- [Distributed Energy Resources Survey](#)
- [Expanding Participation in Operating Reserve and Energy](#)
- [Innovation and Sector Evolution White Papers](#)
- [Market Renewal Program \(MRP\) Energy Detailed Design](#)
- [Updates to Performance Requirements: Market Rule Appendices 4.2 and 4.3](#)

- This engagement was completed in Sept, with Market Rules and Manuals amendments recommended for the interim period
- A Long-Term Design Vision document has been posted detailing the long-term design proposals which will serve as the foundation for future storage design efforts
- On Oct 20, the Technical Panel unanimously voted in favour to recommend the proposed Market Rule amendments to the IESO Board at the Dec meeting
- Proposed Market Rule amendments were approved by IESO Board at Dec 9 meeting
- The amended Market Rules and Manuals came into effect Jan 18, 2021

- Interim Rules and Manual amendments for storage will need to be further updated in advance of the Market Renewal “go-live” date to ensure progress is maintained

---

**Development of an IESO Competitive Transmission Procurement Process**

The IESO is seeking feedback to aid in the development of a competitive transmission procurement process.

*Engagement Lead:* **Dale Fitzgerald**

*Related Engagements:*

- [Formalizing the Integrated Bulk System Planning Process](#)
- [Regional Planning Review Process](#)

- This engagement was put on hold and IESO is currently determining the next steps associated with this initiative

- [Design for Energy Storage Participation](#)
- [Improving Accessibility of Operating Reserve](#)
- [Innovation and Sector Evolution White Papers](#)
- [Market Development Advisory Group](#)
- [Market Renewal Program \(MRP\) Energy Detailed Design](#)

- The final EPOR-E report and Final Engagement Summary Report were posted to the engagement webpage Jan 2021 and a communication sent to stakeholders to inform them that this engagement is now closed
- The engagement webpage has been moved to the Completed Engagements section of the IESO website.

- This engagement has concluded

---

### Resource Adequacy

The IESO is seeking feedback about what tools are needed, in addition to capacity auctions, to competitively achieve long-term resource adequacy.

*Engagement Lead:* **Dale Fitzgerald**

*Related Engagements:*

- [Capacity Auction](#)
- [Formalizing the Integrated Bulk System Planning Process](#)
- [Reliability Standards Review](#)

- As part of the Jan 26 Resource Adequacy webinar, the IESO presented information to stakeholders on the implementation of the Resource Adequacy framework
- In addition to summarizing and responding to stakeholder feedback received in 2020, and confirming the Board-approved high-level framework, the IESO presented new information on a proposed process to translate needs identified in planning documents into acquisition targets through an Annual Acquisition Report (AAR)
- The webinar also reviewed categories of enhancements the IESO is planning to engage with stakeholders for the 2021 and 2022 Capacity Auctions

- Feedback on the Jan 26 materials is due Feb 17
- The next engagement meeting will take place as part of the Mar 22-24 engagement days when further details on the Resource Adequacy framework and enhancements to the Capacity Auction will be presented to stakeholders for discussion and feedback

# Operations

Engagements to ensure that Ontario's electricity resources are operating reliably within the IESO-administered market, while also undertaking continuous market improvements.

- [Design for Energy Storage Participation](#)
- [Expanding Participation in Operating Reserve and Energy](#)
- [Formalizing the Integrated Bulk System Planning Process](#)
- [Market Renewal Program \(MRP\) Energy Implementation](#)
- [Transmission Rights Market Review](#)

- Stakeholders have provided detailed and constructive feedback on all 13 of the draft detailed design documents
- The IESO has posted a complete set of responses to stakeholder feedback, and has reflected this feedback in the updated version of the Detailed Design
- The IESO has also posted a Design Change tracker to point out all of the areas that stakeholder input has improved and updated the detailed design

- The final versions of the detailed design have been posted, and the discussion with stakeholders will carry over into the implementation phase

---

### **Market Renewal Program (MRP) Energy Implementation**

The Implementation phase of the Market Renewal Program will begin by codifying the design into the Market Rules and Market Manuals, and then proceed onto creating tools, testing, training and readiness for bringing the renewed market to life.

### Innovation and Sector Evolution White Papers

The IESO intends to develop and release a series of white papers to support the creation of a shared, fact-based understanding of emerging opportunities and trends.

*Engagement Lead: Colin Campbell*

*Related Engagements:*

- [Capacity Auction](#)
- [Design for Energy Storage Participation](#)
- [Distributed Energy Resources Survey](#)
- [Expanding Participation in Operating Reserve and Energy](#)
- [IESO York Region Non-Wires Alternatives Demonstration Project](#)

- The IESO published Part I of *Exploring Expanded DER Participation in the IESO-Administered Markets* white paper in Oct 2019
- Part II of the *Exploring Expanded DER Participation in the IESO-Administered Markets* white paper was presented during the Nov Engagement Days for stakeholder feedback which was due by Dec 10

- Stakeholder feedback is being reviewed and considered to help inform finalizing the conclusions and to help determine which of the options merit further consideration in future market design work, which should be considered for pilot opportunities, and which do not merit further consideration at this time

### IESO York Region Non-Wires Alternatives Demonstration Project

The IESO, with support from Natural Resources Canada, is undertaking a demonstration in York Region to explore market-based approaches to secure energy and capacity services from Distributed Energy Resources (DERs) for local needs.

*Engagement Lead: Colin Campbell*

*Related Engagements:*

- [Capacity Auction](#)
- [Energy Efficiency Auction Pilot](#)
- [Energy Storage Advisory Group \(ESAG\)](#)
- [Innovation and Sector Evolution White Papers](#)

- Following the July webinar where IESO and Alectra provided information on the demonstration logistics, eligibility, local capacity auction and local energy auction, stakeholders submitted feedback on the draft Demonstration Project Rules and timeline
- On Sept 28, the IESO posted the final Demonstration Project Rules, and opened initial registration (initial registration deadline was Oct 28)
- Final versions of the standard contracts for aggregators and direct participants were posted in Oct
- The first local capacity auction took place Nov 18 – 19
- Participant contracts were issued in early Dec 2020

- First commitment period starts May 1, 2021
- Work is beginning to define Phase 2 of this engagement to determine changes in advance of the second local capacity auction
